

**DFMZ**  
DESIGN FILTRATION MICROZONE

# DFMZ Fan Filter Module

## Key Features

### Easy Installation

With an 11.5" height and light-weight housing, these units install into ceilings with ease. Equipped with a 3-prong electrical cord, they can be plugged in directly to standard 115V or 230V outlets.

### HEPA Duration

The variable speed control helps increase HEPA filter life, by allowing the motor speed to be increased as the loading on the filter increases. This keeps the airflow consistent and resulting in fewer filter changes.

### Convenient Connections

A 115V or 230V duplex electrical outlet located in the filter housing allows up to 5 (2x4) units to be connected and run from one 15-amp circuit (for AC motors only).

## Standard Features

- HEPA filter rated 99.997% efficient at 0.3 microns
- Quick change HEPA filters, six clip system
- Disposable, quick change pre filters, rated MERV 8
- 15' Power Cord, 115V or 230V  
No hard wiring needed
- Duplex electrical outlet on housing
- Uniform airflow across filter face
- Sound insulation for enhanced noise reduction
- Durable, light-weight aluminum housing

### Brand: Slim Line

The DFMZ SL is our most popular fan-filter unit. The new "slim line" housing was designed to fit into tight ceiling spaces where many competing models can not be installed. Our entire series of Design-Aire fan-filter units come standard with many beneficial features.

### CFM Rating (Full speed, AC motors)

2 x 2 = 442 CFM

2 x 4 = 948 CFM

2 x 3 = 730 CFM

2 x 4 ULPA = 916 CFM

Ask about our high efficiency EC motors with higher CFM rating.

**DFMZ standard warranty incl.**
